

## ***Metal Shaping/Coach-building Seminar by Fay Butler March 26-27, 2011***

- Hosted By WyoTech Street Rod, 1889 Venture Dr. Laramie, WY.82070
- Date: March 26-27<sup>th</sup> 8:00 to 5:00 lunch break from noon-1:00
- Time: 8:00 to 5:00
- Limited space: 15 participants maximum
- Classroom instruction on: Material science, numbering system of metals, elements of compound curves, the three shapes in compound curve work, die selection, etc. Coach-building techniques and history in the 30's
- Question and answer period: Bring along any projects that you are having problems with and Fay will help you understand that specific problem. He might even use it as part of a demonstration. In some cases if applicable, maybe you can work on that during the time. Also bring in any favorite tools that you have, hand hammers, dolly's etc for Fay to comment on.
- Demonstration: Hand tools, Wheeling machine, power hammer, operation, set up, adjustment and maintenance cumulating in the shaping of a 32 Ford roadster quarter panel.
- No tools or equipment will be necessary for the work time as we will be using the school's approved equipment exclusively.
- What you should bring: Safety equipment: eye glasses, ear protection, gloves, an open mind and positive inquisitive attitude.
- The cost for both days is \$500. Payment made to Fay to hold your seat!
